Pictography Competition

To bring out the creative thoughts of students, Isaac Newton Global School encouraged its students to take part in the pictography competition. The school is bringing up new and trendy competitions that attract the students and hence a greater number of students participated.

Pictography refers to captioning the given picture. Coming up with creative thoughts and giving their favourite hashtag. The competition was held for all the students from class V to class X. Respective class teachers conducted this activity in the first period. Each class was given a different picture. Teachers showcased the picture on the class white board. Students were given initial 10 mins to observe and think about their suitable caption. The caption had to be written in English language and no offensive language to be used.

The captions were judged on creativity, impact, grammar, word quality and relevance. The students enjoyed this new activity and expressed their thoughts through catchy captions.
