

Report on World Environment Day Photography Contest at Isaac Newton Global School

Date: 14th June 2024

Time: 8:10 am - 9:20 am.

On account of World Environment Day, our school had organised an exciting 'Photography Contest', exclusively for students of grade 5 to 7. The event aimed to foster an appreciation for nature among the young learners by encouraging them to capture the beauty of their surroundings and presenting it in a unique way. Each participant was tasked with either bringing previously taken photos or clicking new ones that highlighted various aspects of nature. The students enthusiastically embraced the challenge, showcasing their creativity and keen observational skills through their display of photographic submissions.

Images ranged from intricate close-ups of flowers and insects to expansive landscapes and serene water bodies. This visual feast provided an immersive learning experience, prompting discussions on environmental conservation and the importance of preserving natural beauty. Teachers were impressed by the diverse interpretations of nature, reflecting each young student's unique perspective. The criteria for judging included relevance, creativity, colour balance, overall impact and presentation. The judges had a tough time deciding the winners as the outcome was highly commendable. Three winners from each class were selected.

The photography contest was an excellent educational opportunity that motivated students to engage more deeply with the environment. By combining artistic expression with environmental education, the contest heightened students' awareness of the natural world. This competition nurtured a love for nature and instilled a sense of responsibility toward environmental stewardship.
